

# Getting Started Guide

## Starter Kit

nRF6700

## 1. Register at [www.nordicsemi.com](http://www.nordicsemi.com) and download all kit software and documentation

1. Go to [www.nordicsemi.com](http://www.nordicsemi.com).
  2. Log in to your **MyPage** account (or create an account first if you don't already have one).
  3. Select **My Products** from the left menu.
  4. From the **Add Product** list, select **nRFGo Starter Kit**.
  5. Click **Add**.
  6. Click the **Downloads** link in the **Overview, My Products** table. Available documentation and software are listed on the **Downloads** tab.
  7. Below **Software** click **nRFGo Studio** and run the install file.
  8. The software will be available from your Windows **Start** menu.
- 

## 2. Connect the nRFGo Starter Kit Motherboard

Connect the nRFGo Starter Kit Motherboard to an available USB port on your computer using the USB cable (included in the nRFGo Starter Kit).

### 3. Plug in the radio module

To start using the nRFGo Starter Kit, an nRFGo compatible radio module (sold separately as part of a Nordic Semiconductor development kit) must be plugged into the nRF module socket on the nRFGo Starter Kit Motherboard.

### 4. Power On

1. Turn the **S8** switch on the nRFGo Starter Kit Motherboard to **VBUS**.
2. Turn the **S9** switch on the nRFGo Starter Kit Motherboard to **ON**.
3. The VTG and VCC LEDs will light up.

## 5. Start nRFGo Studio

1. From the Windows **Start** menu on your computer go to **All Programs – Nordic Semiconductor**. Click **nRFGo Studio** (below the nRFGo Studio folder) to start the application.
2. The connected nRFGo Starter Kit Motherboard corresponds to **Board 0** in the nRFGo Studio **Device Manager** pane (the 7-segment status displays on the nRFGo Starter Kit Motherboard should also show a 0).
3. Now your nRFGo Starter Kit Motherboard is set up for you to use with your development kit.
